

7-Day Skin Flare Tracker

A simple worksheet to bring clearer notes into a Dr. Lurie visit

Use this page to track a small set of repeatable observations. The point is not to diagnose yourself; it is to make the conversation with your clinician more specific.

Track: location of the flare, intensity from 1-10, itch or tenderness, products used, medication changes, sleep, stress, and anything unusual that touched the skin.

For each day, write only what you can remember. Empty boxes are fine.

Day 1: _____ Day 2: _____ Day 3: _____
Day 4: _____ Day 5: _____ Day 6: _____
Day 7: _____
Pattern noticed: _____
Question for visit: _____

If symptoms are rapidly worsening, painful, spreading, or paired with other concerning signs, seek medical advice rather than waiting to complete the tracker.
